

## **Asociación Benéfica Prisma (PRISMA)**

Prisma is a Peruvian NGO that designs and implements innovative research studies and projects to enhance the capabilities of families, and improve the opportunities for vulnerable people, contributing towards the attainment of a more inclusive society and of sustainable development.

Our differential value lies in our proximity to, and knowledge of, the realities of marginal rural and urban populations in Peru, as well as in our working together with public and private organizations in the regions. This, with the involvement of the community, is what allows our team of professionals to plan and implement efficient projects that respond to in-depth analysis of the population's needs.

Over 30 years of experience and innovations with a comprehensive approach to development have expanded Prisma's scope to eight areas of action and paved the way for international expansion into Latin America and Africa. We work in partnership with the central government, regional and local governments, international aid organizations, academic institutions, civil society, organized community and relevant, interested, private businesses.
